

EcoKnight circulating-type gas-fired water heaters

- Recovery rates from 709 to 3819 litres/hour
- Efficiencies up to 96.7%
- Fully modulating pre-mix burner
- Stainless steel heat exchanger
- High working pressure – up to 11 bar
- Low NOx emissions $\leq 40\text{mg/kWh}$
- Integral controls

Lochinvar EcoKnight circulating-type water heaters

EcoKnight gas-fired water heaters are available in 8 different models, with hot water outputs ranging from 709 to 3819 litres/hour, based upon a temperature rise of 50°C. As a circulating water heater, EcoKnight generates fast recovery hot water in the high efficiency stainless steel heat exchanger. This hot water is then transferred to a direct storage vessel or a multiple vessel arrangement, which in turn supplies the building hot water requirements.

This type of water heating method offers a great deal of flexibility, allowing multiple water heater and storage vessel combinations, providing a great deal of installation flexibility. This can be particularly useful where plant rooms have space limitations. The range utilises pre-mixed condensing technology, and offers a highly efficient water heating solution for a wide range of commercial and industrial hot water requirements.

EcoKnight water heater
8 models

Stainless steel heat exchanger

At the heart of the EcoKnight is a grade 316l stainless steel heat exchanger; this material provides superior resistance to corrosion. The coiled design of the heat exchanger allows for condensation to occur, creating high efficiency, particularly on initial heat up.

Fully modulating pre-mix burner with 5:1 turndown

All 8 EcoKnight condensing water heaters feature advanced gas/air ratio controlled combustion technology. This technology automatically adjusts fan speed according to demand, providing the optimum proportions of gas and air to enter the burner. The 5:1 turndown feature ensures that fuel consumption is matched from 20% to full demand. EcoKnight water heaters can therefore achieve high levels of efficiency as follows:-

- Seasonal efficiency (Part L2 gross CV) – up to 96.7%
- Seasonal efficiency (ErP/codesign) – up to 95%

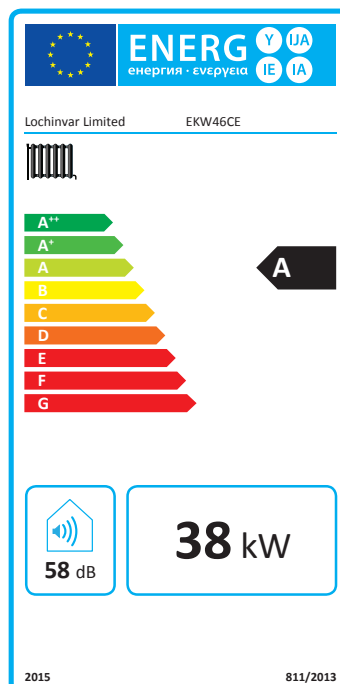

Low NOx emissions

EcoKnight water heaters have low NOx emissions, ranging from 27 to 40 mg/kWh depending upon model, and therefore comply with the latest ErP Regulations dated September 2018.

Energy label

With rated outputs of 41 and 59kw respectively, models EKW46CE and EKW61CE are within the scope of the energy label directive – both models have “energy label A”

Note - EcoKnight water heaters are designed for installation with direct storage vessels (see pages 3 and 4). Energy label and ErP data on our range of direct storage vessels is available at www.lochinvar.ltd.uk.

SMART system controls

EcoKnight water heaters have integral SMART system controls, which provide a wide range of settings without the requirement for a Building Management System (BMS), therefore providing a potential saving on capital cost. This advanced control system includes:

- Multi colour graphic LCD display
- Cascade management of up to 3 x EcoKnight Water Heaters
- Modulating pump control
- Night set back facility – which can also be used for a pasteurisation programme
- Ability to add contractor/service company details into the display

The facility to connect to BMS is also available with 0 to 10 volt connections being available for simple BMS connectivity which allows control of burner and set point

Flue options

A range of flue options are available including traditional conventional flue or room sealed concentric or twin pipe and with flue runs of up to 60m.

Maximum flue lengths

Model	Concentric		Twin-Pipe*		Conventional	
	Flue dia mm	Max. equivalent flue run	Flue dia mm	Max. equivalent flue run	Flue dia mm	Max. equivalent flue run
EKW46CE	80/125	30m	80-80	60m**	80	60m
EKW61CE	80/125	30m	80-80	60m**	80	60m
EKW86CE	100/150	30m	100-100	60m**	100	60m
EKW116CE	100/150	30m	100-100	60m**	100	60m
EKW146CE	N/A	N/A	150-150	60m**	150	60m
EKW176CE	N/A	N/A	150-150	60m**	150	60m
EKW206CE	N/A	N/A	150-150	60m**	150	60m
EKW236CE	N/A	N/A	150-150	60m**	150	60m

* Twin pipe flue assemblies can be supplied with single or separate terminals
 ** Combined length of air inlet and exhaust outlet

Direct storage vessels

Circulating water heaters are designed for installation with separate storage vessels; this provides a great deal of installation flexibility as multiple storage and hot water recovery combinations are available. Our LST and LST GE direct storage vessels are specifically designed for use with circulating water heaters and are available with storage capacities ranging from 297 to 2820 litres.

Key product features include :

- Enamelled steel construction
- Suitable for working pressures up to 8 bar
- Hand hole cleanout
- Tapping(s) for immersion heater back-up
- 5-year storage vessel warranty (model LST166)
- 3-year storage vessel warranty (all other models)

For further information on LST direct storage vessels, please visit www.lochinvar.ltd.uk

Primary circulation pump

It is particularly important to maintain a constant flow through the EcoKnight heat exchangers, therefore we offer a range of suitably sized circulating pumps

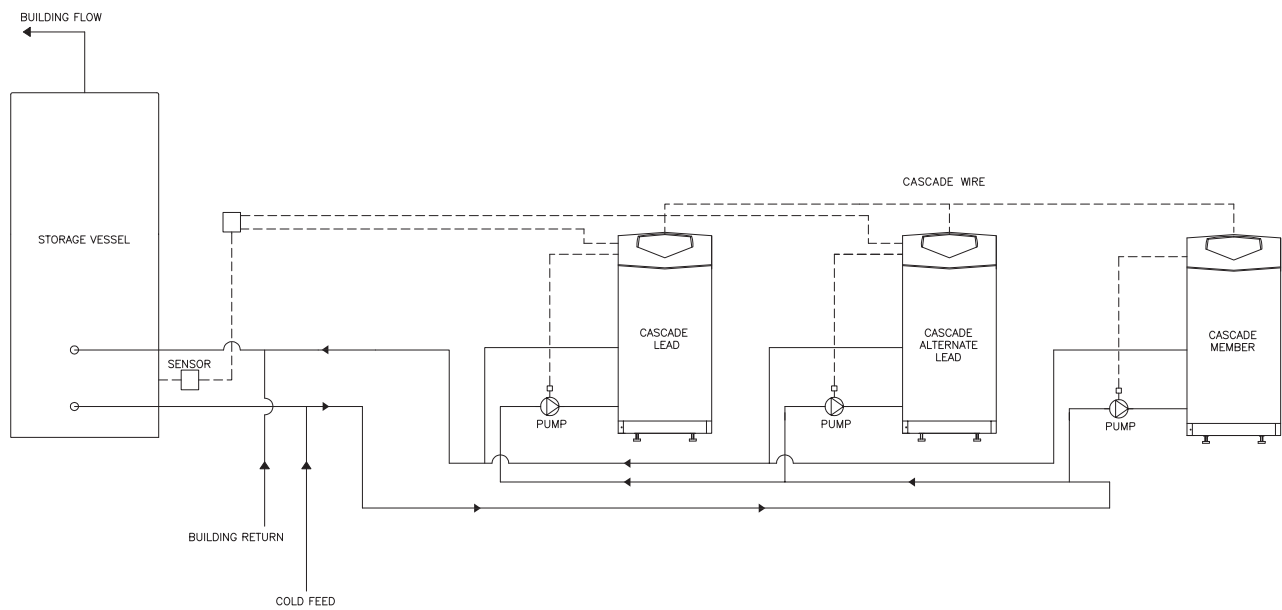

Typical schematic drawings

EcoKnight water heaters and storage vessel combinations provide a great deal of installation flexibility with multiple water heater/storage vessel options available to cover a wide range of water heating requirements

Single EcoKnight water heater with single LST direct storage vessel

Energy label, product fiche and ErP data table are available at www.lochinvar.ltd.uk

Ancillary items – required

- Matched primary circulation pump
- Direct storage vessels

Ancillary items – optional

- Unvented system kits
- Condensate neutralisation kit
- Range of flue options (see page 3)
- BMS Interface Module
