The Lochinvar **High Output LBF** range is a floor standing direct gas fired water heater. The equipment comprises a room-sealed stainless steel burner assembly and a vitreous enamel lined steel storage vessel. They are suitable for use on Natural Gas or LPG.

The appliance incorporates a specially designed baffle suspended in the flueway which increases the transfer of the products of combustion by scrubbing the sides of the flueway. This maximises the amount of heat transferred from the flue gasses to the water by means of convection and radiation. A thick polyurethane insulation layer covered in a steel outer casing keeps heat losses to an absolute minimum.

Sacrificial magnesium anodes are fitted as standard to offer protection from corrosion. The Anodes will require periodic inspection and replacement as part of a responsible service regime.

In-built features include automatic pilot ignition, flame failure protection, operating and high limit thermostats, frost protection all incorporated within the control system. The vessel has two 100mm clean out access openings.

**High Output LBF** Water Heaters are suitable for horizontal or vertical concentric flue installation (C<sub>13</sub> & C<sub>33</sub>). The separate 130mm flue and air ducts from the appliance are connected to a 130/200mm concentric terminal.

A 7 day/24 hour time clock and external ON/OFF switch for remote enable operation or interlocking the appliance to a safety circuit are available from Lochinvar as ancillary options (refer to separate Ancillary Options List for details).
