

Con-X-us Remote control Ancillary option

- App-based control from mobile phone or tablet
- Ability to monitor or control Boiler/Water Heater from any remote location
- Full function interactive display
- Set up email or text alerts
- Free to download App; no ongoing subscription costs

A mobile application that provides boiler or water heater control from anywhere in the world!

Con-X-us is an app-based control, which is available as an ancillary option for *Herald gas-fired condensing boilers* or *EcoShield gas-fired condensing water heaters*. This technology, which requires an internet connection, enables users to link SMART devices with boiler/water heater controls and provides the ability to monitor and adjust from any remote location when connected to the internet

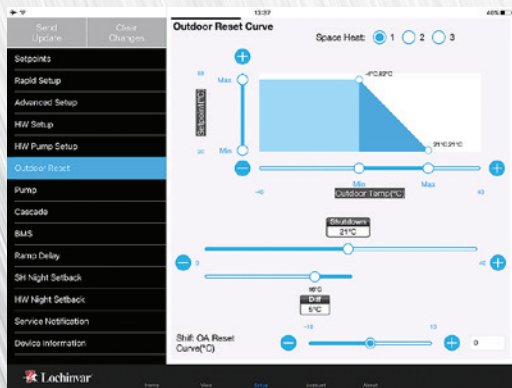

Full-function interactive display

Con-X-us can be controlled via touch screen technology or by typing in field-specific information and allows users to remotely adjust setpoints, outdoor reset curves, pump controls and more.

Con-X-us remote assistance

A key feature of Con-X-us is its ability to allow temporary access to others, this could include maintenance engineers, facilities management contractor or the Lochinvar aftersales support team. All of this is designed to resolve issues as efficiently as possible.

Colour-coded status alerts

Home screen alerts show when the system needs attention, describes the problem and provides solutions. When a failure occurs you can respond quickly, saving time and money.

Multi-party service notifications

The owner/site manager can assign levels of access for up to three additional service personnel to receive alerts via e-mail or text message if there's a problem with the system.
